**Subject:** Treasure Island

Dear Mr. Patterson,

This is in follow up to our conversation on Monday regarding your concerns about potential environmental exposure at the former Treasure Island Naval Base. As I mentioned, Treasure Island is not a National Priorities List Superfund site, so EPA is not the regulatory lead for cleanup oversight at the former base. The US Navy is the lead federal agency for cleanup with the California Department of Toxic Substances Control (DTSC) as the lead regulatory agency overseeing the cleanup, with support from the California Department of Public Health. EPA's role at this site is minimal and supports DTSC, which is not uncommon with regard to sites under other federal agency jurisdiction. I have informed them of our conversation and your concerns and they welcome the opportunity to discuss them with you. The Navy Project Manager is Keith Forman and he can be reached at 619-532-0913, [keith.s.forman@navy.mil](mailto:keith.s.forman@navy.mil). The DTSC Project Manager is Remedios Sunga and she can be reached at (510) 540-3840.

In addition, if you would like a health consultation to be conducted for residents living on the Base, you can contact Libby Vianu at the Association of Toxic Substances Disease Registry. She can be reached at (415) 947-4319.

Sincerely,

Loren

Loren Henning, Chief  
Air Force and DoE Section
